Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: The amendment filed 2/3/05, in light of applicants' comments, puts the application in condition for allowance. Specifically: Independent claim 1 amended (system) now contains the features that the function is applied to resource data associated with each selected resource object obtained by receiving a selection of at least one resource task having an associated function which is thus applied to at least one of each selected resource object to produce resource information as a result of that function, and also that the system concurrently displays the resource information for each respective associated function for the resource objects to which that function is applied in respective shared output display areas, such that a user can concurrently compare resource information produced from applying multiple functions associated with multiple tasks on multiple resource objects. These features, in combination with the user interface system for managing system resources with the multiple resource objects displayed in the resource display area upon which to apply a function associated with a resource task displayed in a task display area, are not set forth in the prior art of record. Independent claim 16 amended (method) now contains the features of receiving a selection of at least one view panel in a shared output display area to be a target panel, and receiving a modification to the selection of the at least one resource task identifying a function to apply to the selection of at least two resource objects. These features, in combination with the method of presenting systems management information relating to

resources in a network, with the multiple resource objects displayed in the resource display area upon which to apply a function associated with a resource task displayed in a task display area, are not set forth in the prior art of record. Independent claim 18 amended (system) shows the system of claim 1 amended, and further includes receiving a selection of at least two different resource tasks each having at least one respective associated function. The features combined are not set forth in the prior art of record. Claim 35 amended (computer program product) shows the computer program product corresponding to claim 1 amended. Claim 36 amended (computer program product) shows the computer program product corresponding to claim 16 amended. Claim 38 amended (system) shows the system of claim 18 amended in means plus function form. Claim 39 amended (system) shows the system corresponding to claim 16 amended. Claim 33 amended (system) shows the system of claim 39 amended and shows the resource information being in the memory system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
